

**COMPARATIVE BIOSCIENCES, INC.**

A TRANSLATIONAL APPROACH TO PRECLINICAL RESEARCH

# Ophthalmology

**MAY 4 - 8**

**ARVO  
2014**

**Leading Eye  
and Vision  
Research**

ORLANDO, FLORIDA

Booth #338

CBI has demonstrated expertise in all phases of the drug development process in preclinical contract ocular studies. Our highly specialized staff is experienced in providing exploratory/proof-of-concept, GLP toxicology, pharmacokinetics, in vivo animal models, pharmacology, and histopathology/immunohistochemistry related to the eye.

**CBI is proud to announce that we are now offering Optical Coherence Tomography (OCT) for research and toxicology studies in laboratory animals.**

Due to CBI's unique and extensive experience in preclinical contract ocular studies and state-of-the-art facilities, we have the skill and expertise to accelerate new ocular drugs from discovery through the drug development process to regulatory submission. CBI is committed and dedicated to providing ophthalmology research and offers a complete range of services to pharmaceutical, biotech, and medical device companies.
