

Introduction of Toxicology

# Oncolytic Viral Vaccines

"Oncolytic viral therapy is a new promising strategy against cancer. Oncolytic viruses (OVs) can replicate in cancer cells but not in normal cells, leading to lysis of the tumor mass."

## Oncolytic Viral Vaccine Toxicology at CBI

CBI specializes in customizing, designing and implementing GLP toxicology studies for regulatory submission as well as research and nonGLP studies with oncolytic vaccine products for our clients.

Comparative Biosciences, Inc. stays at the forefront of new therapeutics, having conducted numerous toxicology programs with oncolytic viral vaccines for our clients. We, at CBI, are excited to help usher in the next generation of therapies!
